DESCRIPTIVE LIST FOR 1951

CONNECTICUT YANKEE

28th Year of QUALITY BULBS

ARTHUR A. ARENIUS

59 BLISS ROAD • LONGMEADOW 6, SPRINGFIELD, MASS.

FOREWORD

It's a privilege and opportunity each year to express in a most humble and heartfelt way our appreciation and thanks for your letters, your kind words and patronage which we have received. They are the incentives that spur us on to greater effort in producing better exhibits at your shows, better varieties to list in our catalogue and the finest bulbs possible.

This past year was one of those rare seasons when the rainfall was spaced just right for good growth, which makes for good blooms and a fine crop of bulbs. I believe it was one of the best summers we have experienced in over 28 years of growing glads.

Some folks feel we should handle only American originations. However, if we are to continue our good neighbor policy it seems to us we should import meritorious foreign varieties regardless where they are produced, as we believe most of you want the best obtainable. At least, this is the policy we have pursued, and hope to continue to try out varieties from all over the world and select the best for listing in our catalogue.

About this time each year I believe one of your problems is to know what to buy and add to your collection in the way of newer glads. Don't take my word, but let me offer a suggestion. Read about the winners in each class at the different shows, visit the shows and gardens and see the blooms, read the different symposiums and the catalogues of Elmer, John, Jim, Herb, Carl, Al, etc., talk to growers themselves about the different varieties, and by then you should have a symposium of your own that should really disclose the merits of a variety. Not infallible, but it will help. You'll be surprised how many of the varieties we list in this catalogue are show winners or highly recommended by others.

As is our practice we have added several new varieties to our list and discarded some varieties that we feel have been superceded by better ones. We spend lots of time and money and give careful consideration in acquiring new varieties. We do not claim to grow all of the good ones as this is impossible with so many being introduced each year, but I am sure you will find our list contains a most comprehensive listing of the better ones. We believe — only the best is good enough.

Sincerely,

Gladiolus! Wondrous color-sprays,
Gorgeous as the clouds in sunset's rays;
Endowed with charming form and dainty grace.
Spires of beauty towering into space;
Floreate clusters; guarding swords of green—
Crown you Nature's wonder and proclaim you
Queen.

UNLABELED COLLECTIONS OF ASSORTED GLADS

Many folks desire to plant glads in their garden for cut flowers, but do not care to fuss with the labeling of the different kinds. To satisfy this need we make up collections of named varieties but unlabeled. In making up an assortment of 100 bulbs we usually put in 3 bulbs each of 35 varieties listed in this catalog, thus being sure of a good color balance. However, if you prefer or dislike certain colors just let us know and we will act accordingly. If bought under name, the varieties in these collections, would cost several times as much. Our hundreds of repeat orders each year are proof of the wonderful results from these collections.

"The glads which I got from you last year were most satisfactory. They were a wonderful addition to my 'backyard garden'."—Sharon, Vt.

"I want to tell you how pleased I am with backyard garden selection of bulbs you sent me. Also to thank you for your generosity for all the extra bulbs you sent me."—Hanson, Mass.

"Am so pleased with the glads received on Saturday that I am ordering 20 more units. Let me thank you for the extra bulbs and their outstanding quality."—Philadelphia, Pa.

PLEASE READ CAREFULLY BEFORE ORDERING

Terms for Ordering — All orders cash with order or, 25% down payment, balance C.O.D. All C.O.D. orders require a down payment. All orders from the retail list will be sent postage prepaid. Orders from the wholesale list will be sent F.O.B., Springfield, Mass. If bulbs from both lists are ordered they will be sent F.O.B. and we will include enough extra bulbs to more than offset the express charges. All orders accepted subject to prior sale.

Orders for bulblets cannot be accepted after April 15th, for small bulbs (sizes 4, 5, & 6) after May 1st, and for large bulbs after June 1st. Orders for assortments can be accepted until July 1st.

Discounts — On all cash orders from the retail descriptive list — \$2.50 to \$10.00 — you may select 10% discount in bulbs of your own choice. \$10.00 to \$20.00 — you may select 15% discount in bulbs of your own choice. Over \$20.00 — you may select 20% discount in bulbs of your own choice. Discounts do not apply to new introductions, collections, or wholesale prices.

On cash orders from the wholesale list — 5% discount on orders from \$25 to \$100. 10% discount on orders over \$100.00.

Extras and Overcount — We give extras with all orders varying with the size of the order. Just mention some of the varieties you would like to buy and we will do our best to please you. We are noted for our generous overcount of number, quality, and size.

Guarantee — We guarantee satisfaction in every way possible. We attempt to send out only clean, healthy, true to name stock, and if in any way you are not satisfied let us know immediately and we will do our utmost to please you. Also if you are pleased we are always glad to hear from you.

Shipping Dates — Unless otherwise requested retail orders will be sent out between March 15 and April 15 in the order received. Wholesale orders will be shipped as soon as possible after receiving them. Order early so as to be sure we are not sold out of the varieties you want. This also gives us more time to fill your order with less chance of error and less overtime.

Bulb Sizes — The retail list contains three sizes —

Large, 1 1/4" up Medium, 3/4" - 1 1/4" Small, 3/8" - 3/4"

Large size bulbs give the largest bloom. However, medium sized bulbs will give excellent spikes about 75% as large. Most small bulbs will bloom and at the same time grow fine bulbs for the following year.

Variety Listing — In the descriptive list the variety name is given first, followed by the originator's name, its show classification and the approximate number of days needed for it to bloom. We have attempted to give a description of the varieties as we see them, listing important faults as well as good points.

"I wish to acknowledge receipt of my order in excellent condition and generously overcounted. And, of course, I want to thank you for the wonderful extras."—Feeding Hills, Mass.

"We always grow super glads in Florida and we tell everybody it is because we get the bulbs from you."—Fruitland Park, Florida.

GLADIOLUS SEEDS

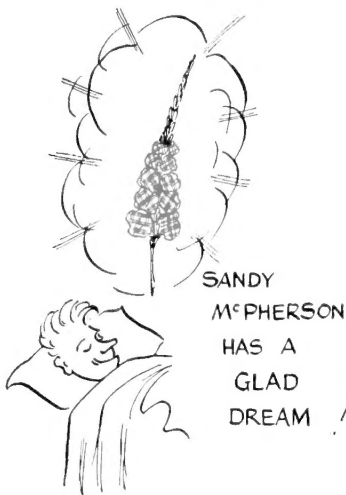

More and more glad growers are getting a kick out of growing glads from seed. This is a very interesting hobby as each seed produces a brand new variety; and with seed selected from good parentage, many worthwhile seedlings may be expected.

The seeds which we offer you are exceptional in that they have been selected from the best and newest of named gladiolus, as well as from our most promising and vigorous seedlings which have not yet been introduced; in fact, these are the seeds which we plant ourselves.

We assure you that keeping records of the sources of these seeds would be a laborious and costly procedure, which would not improve their quality one iota. So, to keep the price low, we are offering them to you in unnamed, mixed lots.

Furthermore, a package of these mixed seeds assures you of a far greater variety of colors than you would receive from a packet of seed from only one cross.

A generous count of 35 seeds for \$1.00. Six packets for \$5.00. Complete planting instructions on each packet.

FAVORITES OF 1950

Here are four lists of varieties representing each person's favorite ten as they saw them this year. Mrs. Arenius and Helen (Mrs. Art, Jr.) both have seen all the varieties in our field as well as at the many shows so are well qualified to comment. They have the added advantage of liking a glad only because to them it is the most beautiful without the influence of statistics such as the size, number open, number of buds, height, etc.

SEEDLING BULBS

For several years now, we have been growing seedlings. It is necessary to discard most of them and only a very few will be named. Most of the others are as good or better than many named varieties and are regretfully and sometimes almost painfully not grown any further because of some fault. They are too good to dispose of so we are going to offer them for sale in the knowledge that they will make a superb assorted collection that cannot be duplicated elsewhere. They cover most of the color range. While they last.

VARIETY COMMENT

We still think that FLORENCE NIGHTINGALE is the finest white for all purposes. Have found no serious faults with it. It has size, height and health and good propagation. Can win at the shows and is a leader as a commercial. Next in line, WHITE GODDESS appealed to us as an exceptionally fine variety with nicely ruffled florets, and destined to be widely grown. For show purposes it is hard to beat well grown spikes of STRATHNAVER, WHITE WINGS or SILVER WINGS. NOVA ZEMBLA and SWING are pure white but seem a little soft in substance. SNOW FLURRY is the whitest of the PICARDY sports and makes a fine cut flower. ROOSEVELT'S MEMORY, TEXAS, and WHITE CHALLENGE are the tallest whites and strong vigorous growers and propagators but lack the refinement of the first two varieties mentioned above. WHITE XMAS is the most heavily ruffled white, but lacks clearness of color and often misplaces. SNOWFLAKE is a fine pure white of medium size. FREEDOM is the best of the blotched whites with us. ARIADNE and MARGARET PETERS, with large throat blotches, are still favorites.

In the creams CONNIE G. still heads the list. It makes an impressive spike of fluted and ruffled florets. LEADING LADY is the champion show winner and the leading commercial. ORIENTAL PEARL is certainly a dependable, consistent grower with very large blooms on tall, straight spikes. Of the creams with throat markings LA VALLE impressed us as being the best variety. The older, SALMONS GLORY, SINCERITY and SPARKS are all fine blotched varieties.

The yellow class is increasing by leaps and bounds. Believe the new one that gave us our biggest thrill was BONANZA, being introduced this year. It seemed to have size, clear color, height, health and extreme earliness, which should make it an exceptional cut flower. In fact we thought so much of it that we bought $\frac{1}{2}$ of the stock. Of the newer ones we also think highly of ROBERT ALAN, SUNDANCE, and LANCELOT, in the order named. The much heralded TERRIFIC was bloomed only from small bulbs but looked as if it might become a heavy show winner as it opens many blooms on a long flowerhead. One of the surprises in the yellows was BOUTON D'OR, 2 years ago condemned because of greenish buds, but this year gave consistently exhibition spikes with 10 open and the green seems to disappear as it opens. GENE, LODESTAR and KATHY LEE are good medium sized yellows intended for cut flower trade with healthy reliable growth and propagation. PERDITA is the best yellow in the 300 class. In the lower priced field we like such proven varieties as CRINKLE CREAM, GOLDEN STATE, JAVA (very early) MANCHU, MASKERADE, SPOTLIGHT and YELLOW HERALD.

In the buff class we will have to give first honors to PATROL after its performance this year. In spite of the early discoloring of the foliage it makes healthy bulbs and good increase, and certainly produces those championship spikes, always straight and tall. It is, however, closely followed by SUNSPOT and PACTOLUS, two very high rating glads and show winners. KAWATIRI would also be in this class if it did not crook so badly, but when you get a straight spike it will equal the others. ATHLONE and SUNLIGHT are also fine varieties.

QUIBERON heads the orange class after its performance this year. We also like BETTY DUNCAN for its nice color and tall, well placed spikes. CHIEF PONTIAC, altho attachment a little loose, was most impressive.

CIRCE has beautiful color but only opens 5 blooms with us. HENRI DE GRIEVE, HUAHUNA, SUNKIST, DAISY MAE, and ORANGE GOLD have all been blue ribbon winners in this class.

In the Salmons, 3 varieties stand out, GORGEOUS DEB, POLYNESIE and SPIC & CPAN. GORGEOUS DEB is undoubtedly one of the most beautiful and most ruffled and easily makes our first 10. POLYNESIE with its smooth salmon color and long flowerhead and many open should become a leading commercial. SPIC & SPAN has won many blue ribbons and is generally rated very high and has already proven itself as a top commercial. BOLDFACE is rated very high but with us lacks length of stem below the flowerhead although a very striking flower. All of these will have plenty of competition from such superb varieties as DIEPPE, KING ALFRED, PALISADES, PICARDY, DOLLY VARDEN, GEN. EISENHOWER and CORDOVA.

The scarlet class has been augmented by such sterling varieties as HAROLD K. a very large, robust growing scarlet that was tops this year and should win first honors in its class. BONFIRE, another tall, robust grower of very brilliant color, ESQUIRE, another fine, strong growing variety. FLAME GIRL of fine color and FIRE GLEAM which should win at the shows as it opens up to 10. Will have to see them bloom another year to evaluate them better but they all looked very promising. They will have to be exceptional to beat RED WING which up to now usually wins at the shows in this class, and performed very well this year. The older favorites are CARNIVAL with its large cream throat for contrast, MOUNTAIN GEM, another strong grower, with silver edgings on its petals and TARAWA, a very clear and beautiful variety. This class should produce some good commercials as the florists like bright, clean scarlets and are looking for another VALERIA with longer flowerheads.

In the long list of pink glads it is most difficult to pick out any particular variety as tops as we have so many outstanding glads in this class. However, on this year's performance, the following stand out, in alphabetical order: ANDRENA, a most beautiful pastel pink. BOISE BELLE, a bi-colored pink and yellow. CLARENCE D. FORTNAM, a heavily ruffled blush pink, EVANGELINE, in spite of misplaced florets, a tall robust beauty in other respects. HEART'S DESIRE, a beautiful very ruffled light pink, MAGIC WAND, another light pink beauty, SILCHERLIED, a most beautiful pink from HOLLAND, SKYWAY, which we think is the most promising prospect for an early pink commercial. Of course, in any listing of outstanding pink glads, we cannot omit such older varieties as, CONNECTICUT YANKEE, still winning grand championships, COTILLION, the variety that opens most of its florets at once, FRIENDSHIP, beautiful early commercial, JUNE DAY, the earliest pink, MARION PEARL, another beauty, and PHANTOM BEAUTY, the blush pink that opens 10 in perfect placement. I know I have not mentioned many other good ones, perhaps your favorite.

Our preference in the red class is as follows and in the order named. MID AMERICA, a little soft, but it makes impressive spikes and is usually the winner at the shows. RED CHERRY, a fine reliable all purpose red. GRACIE ALLEN, a beautiful, clear glistening red. These are closely followed by such standbys as FIREBRAND, BIRCH RED, MANSOER, NANCY, RED CHARM, RED RASCAL and ROYAL WINDSOR. It is in the dark reds that the greatest advance has been made with such varieties as the highly rated HAMLET; RUFFLED KNIGHT, the best dark red

ruffled variety, VELVET MANTLE, very tall and with a long flowerhead, BLACK CHERRY, altho the stem is rather weak, makes large very deep red florets, CAPTAIN KIDD also looked very promising after 1 year's trial. BLACK PHANTOM also produced some exceptional spikes. This is now a strong class with fine varieties.

In the rose class, NOWETA ROSE stands out as the best newcomer and is destined to become a heavy show winner because of its ability to open 10-12 blooms on a tall straight spike. KASHMIR has very beautiful color and appealed to us very much. MACUSHLA, MADELINE HEFTY, and MISS CHICAGO all looked promising. For sheer beauty TOPFLITE is still tops for us. MISS WISCONSIN still the No. 1 commercial. Of course, no list of rose glads can omit such favorites as BUENA VISTA, BURMA, a top show winner, CHAMOUNY, GIANT CYCLAMEN, a rival of MISS WISCONSIN, MODERN TIMES, PREVIEW, TIVOLI, gave us wonderful spikes of large rose-pink blooms last summer and VENIDA, an exceptional commercial prospect when price comes down. LILA WALLACE is a beautiful 300 glad and unexcelled for arrangements or baskets.

BRIDAL ORCHID is probably the most talked about new lavender. When it comes clear, it is very beautiful but some of the spikes bloomed with heavy flecking which greatly detracts. It is, however, a strong robust growing variety and will undoubtedly become a leading show winner. SUNDAY BEST has been placed in the lavender class. It is a question whether it is a lavender rose or a rose lavender. I think it is a light rose with a lavender shading. However, it produces magnificent spikes of clear coloring and grows tall and straight. Strong, healthy, robust grower and above average propagator, and judging the way our florists like it, destined to become a leading commercial. ORCHID MARVEL gave us beautiful, clear, lavender spikes and impressed us as being a variety of great merit. ORCHID LADY is a fine commercial prospect. LAVENDER LACE, a most beautiful ruffled light lavender was also very fine. Of the older ones, PARTHIENA is still a heavy show winner. BENJAMIN BRITTEN, a fine deep lavender. SIBONEY, tho it has a rather short handle, has the depth of color and lasting qualities to make it a valuable florist's variety. LAVENDER PRINCE and PEGGY are fine commercials. WEDGEWOOD, a 300 glad, about the nicest, clearest color in the lavenders, is tops for arrangements and accepted as a useful glad by the florists. PATRICIAN, good clear color, but makes short flowerheads. ABIGAIL, ELIZABETH THE QUEEN, HUNTRESS, LAVENDER QUEEN and MINUET are all fine commercials and also win at the shows.

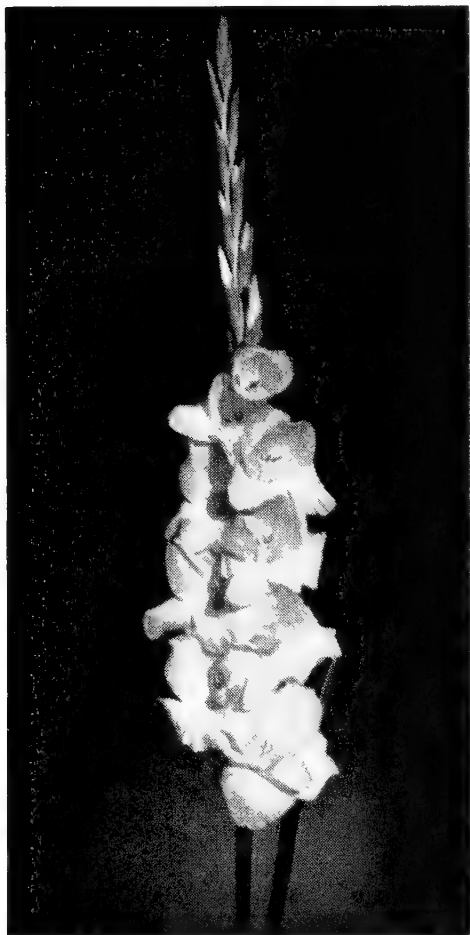

SHERWOOD seems to be the best of purples and with DOROTHY ARMSTRONG and PURPLE SUPREME combines a trio hard to beat. ELEANORA usually wins at the shows as the one with most open florets. RIDGELEY is the largest purple. MARGARET WOOD, KING LEAR and VULCAN, are other purples used commercially.

BLUE BONNET, still the best in the so-called blue or violet class, has some misplacement and hard to germinate the bulblets. RAVEL opens more and has nicer color than BLUE BEAUTY but does not seem as healthy. LIBRETTO is a beautiful light violet but only opens 5 of rather scraggly placement. ABU HASSAN, the best of deep violets. BLUE LAGOON, the tallest blue. For commercial use, we like BLUE BEAUTY, HIGH LIFE and MAX REGER. Think this is our weakest class that certainly could stand some improvement.

GRAY SUMMIT is a fine addition to the smoky class. This is an even gray smoky that grows tall and impressed us as the best of the new ones. PERSIAN RUG, a blending of deep tones that was unusual and beautifully striking. ADVENTURER, another deep toned smoky was a pleasant surprise. MAPLE LEAF, the largest smoky, produced very large blooms and can win at the shows as largest bloom. CHOCTAW and WAHOO, brown toned beauties with long flowerheads. BRONZE KING produces beautiful blooms of an even bronze shade and is one of our favorites. TUNIAS MOHAMET vies with MAPLE LEAF as the largest and a favorite with many. FLYING FORTRESS opens up to 12 blooms on an unusually long flowerhead. Some misplacement, but when it comes right, is breathtaking. ROLLA and ROBINSON CRUSOE with their marbled striping are bizarre and certainly different. Of the older smokies generally liked, the following are favorites. DUSTY MILLER, HIGH FINANCE, MISTY DAWN, MOTHER MACHREE, BUCKEYE BRONZE and VAGABOND PRINCE.

NEW INTRODUCTIONS FOR 1951

DEE TWELVE (Arenius) (452)

Seedling D-12. After debating for three years whether to introduce Dee Twelve or not we are finally doing so. Its main fault is a somewhat short flowerhead in proportion to its very tall ($5\frac{1}{2}'$ — $6'$) overall spike. However, a two year A rating from the N. A. G. C. trial gardens, as well as numerous letters of praise from the many growers who have tried it, plus a very good reception by our local florists, have convinced us that we should let others grow it as well.

Dee Twelve is a clear medium red self color opening up to 8 blooms, with 6 showing color on an 18 to 22 bud spike. Occasional spikes will show some misplacement. Blooms are $5\frac{1}{2}"$ — $6"$ in size with good attachment. Growth has been very healthy with deep green foliage and numerous bulb-lets, that germinate well and make good sized bulbs. Its outstanding quality is its wonderful color which we believe is the best in its class.

A good stock permits a moderate introductory price.

Bulbs \$1.50 each any size. 10 for \$12.00. Bulblets 25c each. 10 for \$2.00.

"I want particularly to hit (the shows) with your D-12 this year as it is the finest red I have ever seen as it bloomed here, possibly too large for florist use, but a great exhibition glad that will go places."—Yakima, Wash.

"D-12 proved to be a beautiful glad which the Mrs. and I liked very much. I would describe it as 'Chinese Red', having large florets and a long flowerhead—7 open with 9 showing color—total of approximately 23 buds. The bulb is healthy and produced numerous bulblets."—Binghampton, N. Y.

"The red seedling you sent me for trial last spring did very well. Everyone admired the color, and it made a fine tall spike. Flowerhead might have stretched a little more, but it wasn't planted in the best part of the trial garden. Placement not perfect on all spikes, but a wonderful color, admired by everyone. Going to name it?"—Boise, Idaho.

"Just a note concerning the trial bulb of D-12 that you sent me. It is a wonderful grower. I would say that its nearest competitor is Mid America. But, as it grows for me, I prefer D-12 to the latter variety."—Minnesota Lake, Minn.

ORCHID FANTASY (Siemsen) (466)

Here is a glad your florists will demand in big quantities, an exquisite pastel shade of pale orchid. Never flecks. Wide open $4\frac{1}{2}"$ florets with seven open. Always places and faces perfectly. Fifty-five inches tall. Never crooks. One of the few glads that you can cut any time during the hottest part of the day, as the florets do not wilt in the sun, always looking fresh. Neither do the bud sheaths burn or brown from the heat. Bulblets germinate easily.

Prices: Large—\$5; Medium—\$4; Small—\$3; Bulblets—50c each.

BONANZA (Siemsen) (412)

An outstanding clear medium commercial yellow. Those who have seen it and grown it claim it to be the best and largest early yellow. It blooms at the same time as Van Gold. Grows five feet and more tall — opens six or seven large well placed florets on a long, easy-cutting stem. No crooks. Bulblets germinate easily.

Award of Merit — 1950 — Connecticut.

Commendation — 1950 — New York.

BLUE DEVIL

1951 Introduction

Class 478

BLUE DEVIL is a clear deep violet with a rose blotch on a conspicuous white throat — entirely different in appearance than any other glad we have seen. It grows to a height of 60" with a tall, strong stem that does not crook or fall over. The flowerhead is from 24" to 27" long with 18-21 buds and 7 open. The 4½" florets open flat, are strongly attached and place well. Propagation and germination are excellent and bulblets frequently bloom. A strong, healthy grower.

BLUE DEVIL has won in the blue classes whenever shown. It made a clean sweep of the 478 class both days at the 1950 Connecticut Show. Its record includes

1950 Connecticut Show — Award of Merit — Best Seedling

Most Popular Variety in the show by vote of the public. Received as many votes as the next three varieties combined.

1950 Eastern International Show — "A" Rating

1950 N.E.G.S. Show — Award of Merit

BLUE DEVIL appears to be a long step forward in the search for a reliable, healthy blue.

Prices for 1950-1951 — Large \$5., Medium \$4., Small \$3., Bulblets \$1.

ROSY FUTURE

Originated by Paul Pletcher

The color is a deep rose with a light fuchsia cast. A statuesque beauty that is unique in color that will rate a top place in any list of most beautiful glads.

Grows 48 to 52 inches tall, with a 25-27 inch flowerhead with 20 buds. Opens six with six more showing color. The 4 to 5 inch florets are firmly attached, and are well placed.

It is an exceptionally strong, healthy grower, in fact I believe that this makes the best looking bulbs of any variety that I have ever grown. Has a glossy green color foliage that is upright making for easy cultivation. Wonderful substance, refinement and lasting qualities.

Because of its beauty, health and other fine qualities ROSY FUTURE will be in demand by Hybridizers, Show fans and Commercial growers.

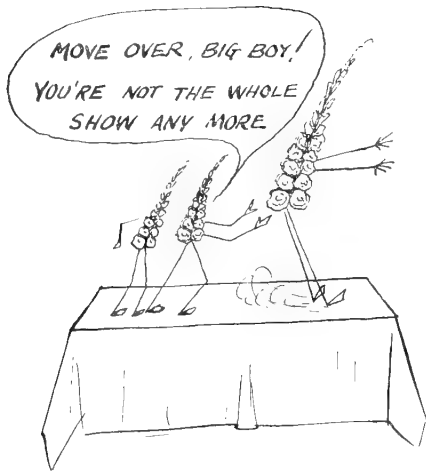

Price — any size \$2., and with each corm you may have 10 Bulblets at 25c each.

THE MINIATURES

After careful selection, we have added the following small flowered or miniatures to our list. They fill the need for dainty table decorations, show arrangements, corsages, bridal bouquets or other uses where the large flowered glads seem out of place. They have appeared in increasing numbers at the shows and the 200 classes were well filled at last year's exhibitions. Some of us can only "see" the large flowered glads, but perhaps, like an appreciation for classical music or opera, we need to have our tastes "educated".

CARE AND CULTURE

(Complete planting instructions will be included with each order)

SOIL AND FERTILIZER

Glads do well on most any soil if they are planted in the open garden where there is plenty of sunshine. You may work well rotted manure into the soil in the Spring by putting it into the bottom of your planting trench, then covering with an inch of soil; then planting your bulbs. Vigoro is also good. Two or three applications of commercial fertilizer may be made on the surface along the rows during the growing season before the plants bloom. Any fertilizer should be kept from direct contact with the bulb or foliage. If you wish to grow immense spikes, you must fertilize heavily; your plants must also have at least an inch of water every three or four days.

PLANTING

Work soil to a depth of eight inches, or ten inches will be better. Large bulbs should be covered with about six inches of soil. The deeper planting helps keep them upright when blooming. Smaller bulbs should be planted not less than two inches. You may regulate your distance apart in the row by the space you have. Plant rows anywhere from 2 ft. to 3 ft. apart. Plant in rows from two to six inches apart, depending on space and number of bulbs. They do well planted close together, but require more water.

DIGGING AND STORAGE

Our early stock is taken up in early October. The bulbs should be taken up within six weeks to two months after blooming but before the tops begin to get brown. Even if the tops are green, bulbs should be taken up before the ground freezes deeply. After digging, cut off the tops close to bulb and put in screen bottomed trays to cure. They should have plenty of ventilation while curing and must not be put in containers more than three or four inches deep. At this time Napthalene flakes (procured from your druggist) may be safely scattered on the bulbs which are dormant. Use at the rate of an ordinary handful per 100 bulbs. A little more or less won't do any harm and it will drive away any thrip that may be harboring an idea of wintering on your bulbs. By the time you are ready to clean the bulbs most of the flakes will have evaporated. A note of warning! DO NOT use them in the Spring when the root nodules appear at the base of the bulb, as they are harmful and prevent normal growth of the plant. Use them right after digging or early winter. Stir them every few days and keep dry. In four weeks they will be cured so that old bulbs may be removed from the bottoms. They may then be placed in storage. Proving very effective as a thrip control in storage is a light dusting of 5% DDT powder. This is very good if the bulbs do not have to be handled during storage as DDT powder is poisonous.

The storage temperature is best at 45 to 50 degrees. Your storage room should be dry, cool and ventilated and as near uniform as possible as to temperature. It is well to look at your bulbs every two or three weeks. If they show signs of too much moisture or look mouldy, dry them out and give better ventilation. Keep them in small containers and spread thin.

THRIP AND DISEASE CONTROL

With the advent of D.D.T. as a dust or spray for thrip on gladiolus the problem has become of minor importance. A few dustings or sprayings after the plants are about 8-10 inches high will eliminate all trouble from that source.

DDT Spray

2 rounded teaspoonfuls DDT (50% wettable). 1 teaspoonful Dreft. 2 gallons of water. Spray every 8-10 days till glads begin to bloom.

DDT Dust

Use 3 or 5% dust. Preferably use a dust also containing a good fungicide. Dust lightly every 8-10 days till glads begin to bloom.

BULB DIPS

As a disease preventative for bulbs. We recommend this as a precaution both for your old bulbs and new bulbs no matter where obtained.

Dips for Control of Thrips and Disease

BICHLORIDE of MERCURY — 1 oz. Bichloride of Mercury. 7 gallons of water. Soak 10 to 12 hours immediately preceding planting. Plant wet. Must be used in an earthen or wooden container.

LYSOL — 1 tablespoonful of Lysol. 1 gallon of water. Soak 4 to 6 hours immediately preceding planting.

NEW improved Ceresan — 1 oz. of N. I. Ceresan. 3 gallons of water. Weigh carefully and leave bulbs in solution 15 minutes. Do not leave bulbs in solution over 20 minutes and be sure to plant immediately after dipping.

JOIN A GLADIOLUS SOCIETY

There are gladiolus societies in nearly all localities of the country composed of glad fans of all degrees — from the backyard gardener with a few bulbs to the commercial grower with his many acres. With them you may receive the benefit of their publications with the most up-to-date information of all kinds pertaining to gladiolus, good fellowship at their shows and meetings (who else can fully appreciate that 8" bloom in your garden?), and a chance to test your growing skill at the many gladiolus shows.
